

Gasman

- **INSTALLATION FOR SOLDER CONNECTION**

- While brazing solder connection Valves, disassemble the valve/product to safe guard the internal components. While brazing use suitable low temperature filler material; avoid over heating of the valve / product.
- Before re-assembling allow the valve/product to cool down to room temperature and clean thoroughly .
- Use fresh 'O' ring/ seal every time the valve/product is reassembled.
- Use Torque wrench set at correct torque while reassembling the valve / product to ensure leak tight fittings and avoid damage caused due to over tightening.

- **CERTIFICATES**

- Test Certificate for Material Composition and Leak Testing can be provided.

- **WARRANTY POLICY**

- All the Products will be replaced / repaired free of cost against any manufacturing defects for the period of 12 months from the date of sale.
- Products damaged due to mishandling / faulty installation / substandard operating conditions are not liable for warranty.
- Scope of warranty is limited to free replacement / repair of defective product / part only.
